we did not receive any applications for Category 2, 3 or 4 buildings

CONTACT PERSON:Patrick W Giles

REFERENCE:

• In 2013, the formula for the denominator of the MPMP efficiency measures for building permits and inspection services was changed to a three year average for total construction activity, divided by \$1,000. Also in 2013, effectiveness measures were introduced that record the number and percentage of complete and incomplete building permit applications, by category.

Roads Cont'd

CONTACT PERSON:Patrick W Giles

REFERENCE:

• The formulas for efficiency measures were revised in 2009 to reflect changes in the reporting of expenses consistent with accrual accounting concepts. New total cost measures were introduced and revised in 2010. Total costs mean operating costs as defined in MPMP, plus amortization and interest on long term debt, less revenue received from other municipalities for tangible capital assets.

• ¹ The formulas for efficiency measures for paved roads were revised in 2010 to net out revenue received from utilities for utility cut repairs.

• ² Pavement condition is rated using a Pavement Condition Index (PCI) such as the Index used by the Ontario Good Roads Association (OGRA) or the Ministry of Transportation's Roads Inventory Management System (RIMS).

• ³ A bridge or culvert is rated as being in good to very good condition if distress to the primary components is minimal, requiring only maintenance. Primary components are the main load carrying components of the structure, including the deck, beams, girders, abutments, foundations, etc.

		for 10.2 a & b and 10.3 a & b the figures not allow for these figures to be caculate					

CONTACT PERSON:Patrick W Giles

REFERENCE:

• The formulas for efficiency measures were revised in 2009 to reflect changes in the reporting of expenses consistent with accrual accounting concepts. New total cost measures were introduced and revised in 2010. Total costs mean operating costs as defined in MPMP, plus amortization and interest on long term debt, less revenue received from other municipalities for tangible capital assets.

• ICI means Industrial/Commercial/Institutional.

REFERENCE:

• The formulas for efficiency measures were revised in 2009 to reflect changes in the reporting of expenses consistent with accrual accounting concepts. New total cost measures were introduced and revised in 2010. Total costs mean operating costs as defined in MPMP, plus amortization and interest on long term debt, less revenue received from other municipalities for tangible capital assets.

• * The calculation of electronic library uses was updated in 2009 to include the number of people using the public library wireless connection. In 2011 three additional categories of reference transactions were added to the definition of library uses. This may affect the comparability of 2011 results with earlier years.
